

# Hatboro-Horsham High School Robotics Team Visits State Capitol

On March 31st, Team 708 Hardwired Fusion, a FIRST Robotics Competition program based out of Hatboro-Horsham Senior High School, visited the State Capitol and conducted a robot demonstration. The program promotes science, technology, engineering, and mathematics within the school and community.

Students on the team mentor three FIRST Lego League teams; demonstrate their skills at community events; and work together to design, fabricate, assemble, and program a FIRST Robotics Competition robot. In addition, the team hosts the Hatboro-Horsham FIRST District Event at Hatboro-Horsham High School, the only public high school in the Commonwealth to host such an event. The team recently competed and placed in the semi-finals at a competition, and will compete at the Mid-Atlantic Regional Championship at Lehigh University's Stabler Arena, April 10th through 12th, 2014.
