Leakproof Bag

Introduction: We have a sharp idea for you, as today, we are going to poke through a bag of water without spilling a drop.

Approximate Time: 10-20 minutes

Materials:

- Sharp pencils
- Water
- A sealable plastic bag
- Container/sink
- Paper towels

Procedure:

1. Sharpen the pencils until they are sharp.
2. Fill the plastic bag halfway with water and seal it tightly.
3. Hold the top of the bag in one hand and hold the pencil in the other hand. Push the pencil through the bag and watch as no water leaks!
4. Try using different types of plastic bags and puncturing the bag with multiple pencils.

Tips & Tricks:

- Make sure you puncture the bag slowly to avoid spilling water.
- Use different bags and pencils to try and find varying results.
