

Magic Sand

Introduction: Get excited about this sandy trick as today we are going to be making magic sand!

Approximate Time: 5-10 minutes, 2-hour wait time

Materials:

- Finger Colored Sand
- Fabric Protector Spray
- Plate or Baking Paper
- Cup or Bowl
- Water

Procedure:

1. Spread sand over a plate or sheet of baking paper.
2. Spray fabric protector over the sand in an even layer until damp, make sure you are in a ventilated area. You may also want a parent to help you out with this step.
3. Wait for the sand to dry and rake it with a fork
4. Repeat steps of the process again.
5. While waiting for the sand to dry, take your water and fill the glass so that it is three quarters of the way full
6. Once the sand has dried pour it into the water and create your own underwater sculptures.
7. Now that the sand is submerged in the water what do you think will happen? Will the sand be wet?
8. Remove the sand and observe if the sand is wet or dry.

Tips & Tricks:

- Spray the sand with the fabric protector multiple times for the best results!
