

Spicy Static

Introduction: Learn how to separate salt and pepper using static electricity!

Approximate Time: 5-10 minutes

Materials:

- An empty plate
- About 1 teaspoon of pepper
- About 2 tablespoons of table salt
- 1 fully blown-up balloon

Procedure:

1. Pour the salt and pepper onto the plate and mix them together.
2. Run the balloon through your hair a few times to create static electricity.
3. Hold the balloon just above the plate and the pepper should jump to it.

Tips & Tricks:

- The more you rub the balloon in your hair, the more static electricity there will be.
- If it isn't working, try to rub the balloon through your hair again.
